Promo Espacio

React Developer (Project-based)

- Technologies used: Classic ASP, SQL Server, Remote Desktop, .Net
- Activities: development of a new module within the application called SAC, called Bitácora; which consists of exporting to Excel all the spots and ads made during the month for different clients and their branches.
- Projects: "Promo Espacio – SAC"
- Reason for leaving: Lack of budget in the project.

MAIN TECHNICAL SKILLS

JavaScript 

React,
Angular 

Git (Github,
Gitlab,
Bitbucket,
Azure Git) 

Data
bases
(NOSQL y
SQL) 

Containers
(Docker,
Kubernetes) 

January 11, 2022 - June 30, 2022

Monterrey, Nuevo León, Mexico (Remote)

Onibex

React Developer (Project-based)

- Technologies used: React, Next.js, Material UI, Zoho People Plus, Zoho CRM, Gitlab, Skype
- Reason for leaving: The initial phase of the web app construction was completed.
- Activities: I developed a new tool called Fleter (previously known as Plug & Deliver), which includes both web and mobile applications. Fleter allows you to manage and track shipments sent through freight services. For the web application, I developed various modules that connect to REST APIs to enable seamless integration.
- Projects: "Fleter"

October 1, 2021 - January 1, 2022

Mexico City (Remote)

Hobbio, Inc.

Software Engineer (Project-based)

- Technologies used: React, Azure Git, Azure Board, Microsoft Teams, Gatsby
- Reason for leaving: Found a new project opportunity with better economic prospects.
- Activities: I developed new modules and functionalities while also providing maintenance for the application.
- Projects: Sport City

October 1, 2021 - October 27, 2021

Morelia, Michoacán, Mexico (Remote)

Cantera Digital

Web Developer Intern

- Technologies used: CodeIgniter, Skype, SQL
- Reason for leaving: Found a new project opportunity with better economic prospects
- Activities: I developed new functionalities, both frontend and backend, and provided maintenance for the CRM (Customer Relationship Management) system of a travel agency company.
- Project(s): Internal CRM

June 2, 2021 - January 14, 2022

Morelia, Michoacán, Mexico (On-site)

Softwareland

JavaScript Developer

- Technologies used: React, Feathers.js, Next.js, Loopback, Discord, Slack, Node.js, MongoDB, GitLab, Github, Bitbucket.
- Reason for leaving: Found a new project opportunity with better economic prospects.
- Activities: I was responsible for a project at 70% completion, where I provided maintenance and developed new functionalities for the CRM of RS Viajes company. I also offered technical support to employees regarding the CRM. Additionally, I provided assistance with other CRMs for different clients of Softwareland.
- Projects: RSViajes, Dihico, inAdvisor, VDM, Zaymo, IPCO.

July 22, 2020 - May 15, 2021

Morelia, Michoacán, Mexico (On-site)

Rompopes y Bebidas Mexicanas (ROBEMEX)

Web Developer

- Technologies used: HTML, CSS, Vanilla JavaScript, Angular, Angular Material, Google Meet, Github.
- Reason for leaving: Contract completion.
- Activities: I was involved in the development from scratch and maintenance of the corporate websites for ROBEMEX. Additionally, I provided technical support to the employees of the factory. I also conducted research and maintained domain names and created corporate email accounts.
- Projects: ROBEMEX, Rompope Carmelita, Rompope de la Abuela, Mexizcal.
